## Developing a successful Integrated Waste Management Facility – Seberang Perai, Malaysia

With a landfill facility that is rapidly reaching full capacity and no alternative in sight, the Seberang Perai City Council was facing significant challenges in managing waste. Through the rich exchange of ideas and knowledge sharing during the Temasek Foundation Urban Resilience Programme (TFURP), city leaders managed to resolve the issue in a resource-effective manner.

This is the second instalment in the TFURP series of success stories.

## CLC at the Singapore Pavilion, COP28

CLC curated programmes for the “Cities and Built Environment” thematic days at the Singapore Pavilion at COP28 in December 2023. This included a series of panel discussions and fireside chats that highlighted Singapore’s efforts in developing a sustainable built environment as the sector is of utmost importance and relevance to achieving Singapore’s net-zero targets.

Details on CLC’s thematic days of 8 and 9 December follow:

### Cities in the Post-COVID Age

Changes to the world’s urban dynamics in the post-COVID world are challenging many of the assumptions of the 1995–2020 period. This article explores how urban dynamism has shifted globally, from Hong Kong to Singapore and Dubai, California to Texas, Istanbul to Warsaw and so on.
