SINGAPORE

**LECTURE SERIES**

The city of Freiburg, Germany is widely considered as one of the shining example of sustainability in Europe with its eco-housing, car-free streets with over more than 400km of cycle paths, and socially conscious residents. Starting earlier than most cities in 1970s, Freiburg has tackled energy and climate change, transport and land use, urban liveability, safety and democratic issues in an integrated approach. Professor Daseking, a key figure in shaping Freiburg will give a lecture on planning for ecological and sustainable towns. The focus of the lecture will be on planning strategies to facilitate planning and development of towns that are oriented towards public transportation, decentralised urban development and cities of short distances.

Speaker

**Prof Wulf Daseking**  
Professor, University of  
Freiburg, Germany  
Assistant Professor, Bartlett  
School of Architecture, UCL

Moderator

**Wong Mun Summ**  
Founding Director  
WOHA Architects  
Singapore
